*" True education is concerned not only with practical goals but also with values. Our aims assure us of our material life, our values make possible our spiritual life." -
Ludwig Mies van der Rohe*

Experience Sharing

"After coming over here, these children are exposed to self-dignity, awareness and dignity of labour by imbibing human values in them in this process. Their way of living and attitude are completely changed."

**K V Sathyanarayana Murthy, Headmaster
SSS Karunyaniketanam, Tumkur**

I am working as a headmaster at SSS Karunyaniketanam. I have 50 years of experience in the teaching and academic administration field. It has been my long cherished desire to serve in this type of institution and I got this golden opportunity to work here. I remain grateful to this institution till my blood is red.

Here, they select children from families of low socio-economic status or below poverty line who cannot provide a square meal to them regularly. The children brought here would have been doing some daily labor or petty jobs. This institution comes to their rescue and provides free education to save and brighten their lives.

I am happy and satisfied with the nature of this work amidst the small children with pure hearts. After coming over here, these children are exposed to self-dignity, awareness and dignity of labour by imbibing human values in them in this process. Their way of living as well as their attitude is completely changed. They are accustomed to a disciplined lifestyle in a well planned time schedule. They learn bhajans and veda in an ideal rhythm. Yoga, physical exercise, and athletics are a part of their regular schedule to improve neuro-muscular coordination and well being. All these practices keep them in a high spirit. Audio-visual education, science class, and language learning are a regular feature. We, the teachers, take the role of second parents (mothers) to shape the children in an ideal way in order to be useful to society under the guidance of our chairman and warden.

Rain Water Harvesting- Students Account

Rainwater harvesting means collecting rain water for later use. Rooftop Rain Water harvesting is one of the techniques through which rain water is captured from the roof through pipes and stored in a pit. Another option is to allow water to go into the ground directly.

Sriniketh CH, 7th Grade
SSS Karunyaniketanam, Tumkur

When rain falls onto the roof, it leaks down and the water becomes a waste. For this problem, we can create channels and connect them to ponds, rivers etc. From those water sources we can water the plants. In our campus, we have a small pond where we harvest water from rain and use that water for plants. These plants give fruits and vegetables that we can eat to be healthy and happy.

SSS Vaniniketanam Girls School, Gadag

(One of the PBMT schools)

Students at the campus are trained to follow an ideal way of life that nurtures their body, mind and soul

Students exhibit their skills in Arts and Crafts

Animal Love!

Students revering their parents. Values they learn on campus!

Mothers lovingly volunteer to cook delicious food for the students and staff. The love parents have for this institution is amazing!

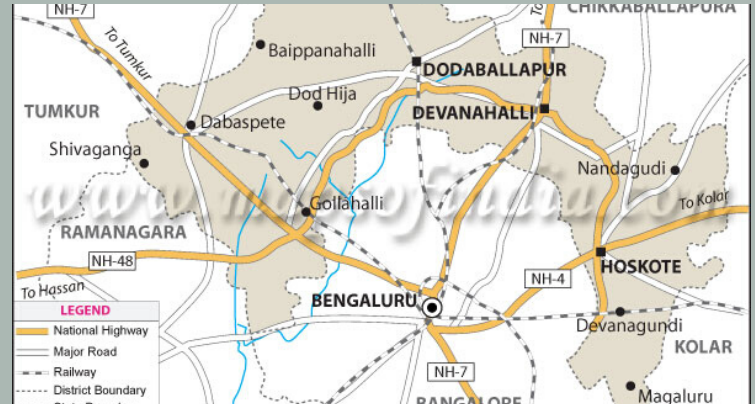

Girls show their acting skills with the props they created!

Who Are We?

SSS Karunyaniketanam (Boys) School, Tumkur

Doddaballapura School for Girls

Our Story

'Education For All' is a rural outreach program to provide quality education free of charge to children from all walks of life irrespective of cast, creed, religion or any other background. At present we have tied up with Prashanthi Bala Mandir Trust (www.pbmt.org) to provide support in sponsoring children and help in construction and maintenance of Schools. Currently we are helping in the construction and maintenance of two schools, the Doddaballapur campus for girls and the Tumkur campus for boys both near Bengaluru in Karnataka state in India. We are also supporting the education and residential costs of those students studying in these schools.

Status of the Tumkur School (Boys)

- **Plan:** The school will be spread over 40 Acres of land with total built up area of about 120,000 Sq Ft
- **Land Purchased:** October 2017
- **Construction started:** March 2018
- **Temporary structure inauguration:** June 2018
- **First batch admitted:** June 2018
- **Second batch admitted:** June 2019
- **Under construction:** Hostel building and class rooms

Unique Features of this school

- Free Education for all students. Currently, this campus has a total strength of 102 students studying in 6th and 7th grades (Kannada medium and English medium)
- Residential School: Hostel fees are exempted for financially challenged parents. Most of the children enrolled in the school hail from under-privileged sections of India.
- Each one educate one: Self-sustaining model of quality education through support and involvement of alumni, local communities, and society.
- Highly-nourishing food and well-designed dormitory facilities. Digital education, environmental education, sports, community service projects and personal spiritual development
- All campuses are designed to be “Green” with a focus on using solar energy-based power supply, water conservation, tree planting and similar environmental initiatives.
- The 3H formula: Empowering the Head, heart, and hands. Holistic education that nurtures a child’s physical, intellectual, emotional, and spiritual well being.
- A harmonious atmosphere where children celebrate diversity of faiths, and develop mutual respect and love through community service and self reliance activities.

Status of the Doddaballapura School (Girls)

At present we are in the process of acquiring 30 Acres of land. Once the land has been identified, then the first phase of the construction will begin. The school when fully built will have classes from 6th grade to 12th.
